

Our Promise

We promise not to waste your kind donations on administrative costs.

Unlike many larger charities, we are able to make this promise because we have no offices and no paid staff. All staff involved in the administration of HEAL are volunteers.

So, with very small administrative costs, much more of your money actually goes to providing shelter, support, education and health care for needy children.

HEAL is a registered charity, so there are significant tax advantages arising from personal and corporate donations in the UK, India and the USA.

heal

health and education for all

Providing:

- Homes
 - Food
 - Education
 - Health Care
- for orphans and underprivileged children in India

What we do

HEAL is a registered charity formed in 1992 - we are committed to providing shelter, support, education and healthcare to well over 1000 children in India. HEAL currently manages a number of projects including the Heal Children's Village in Guntur, the Heal Paradise Village under construction in Thotapalli and others in Andhra Pradesh and Telangana, India. Through these projects HEAL is working hard to provide homes, food, education and medical care to orphaned and severely underprivileged children.

What we have achieved so far:

Heal Children's Village, Guntur

Two hundred children of all ages are housed, fed, schooled and cared for in a purpose-built centre in beautiful surroundings out side the city.

Makineni Health Centre, Guntur

Health care is provided for the children's village and for the children of local farmers and quarry-labourers.

Bhadrachalam School

HEAL provides school fees, uniforms, books and lunches at this remote rural school for 300 of the most needy children in an area of much illiteracy.

ASNRAZP School, Vijayawada

HEAL supports this city school for 350 underprivileged children in a deprived area. Many of the children cannot even afford a pair of sandals.

Paradise Village - Our latest project

Heal's latest project is a new village and school to care for and educate 1000 orphans and the poorest children from anywhere in India. Construction of Phase one on the 27 acre site is due for completion summer 2015.

The Village will...

- Create a safe haven where 1,000 needy children can be nurtured and realise their full potential;
- Create a self-sustaining and mutually beneficial community based on the pursuit of happiness through the common good;
- Use the best available methods to minimise resource usage and to reduce and recycle waste.

The village is leading the way in construction using recycled waste materials and in the use of 'green' technologies for electricity, water, sewage and the growing of organic vegetables.

The village contains:

- School buildings
- Mrs. Ramaseshamma Chundurri Vocational Training Centre
- Navaratna Siromani Bellam Health Centre
- Hans Dorm for boys and Rajeswari Dorm for girls
- Sports and arts facilities
- Accommodation for visiting volunteers
- Vegetable growing areas
- Senior's and teaching staff accommodation
- Jasti Kameswari Pre school
- Phanendra Chundurri Institute for for the visually impaired

How you can help with this new project

Sponsor a building or a classroom

We now need funds for each building. If you wish, you can have a building or a room named after you, your company or a loved one. Please see our website for details - www.healcharity.org

Make a donation

Either a single contribution or a regular donation.

Please see our website or contact a HEAL office for details of this easy way to contribute and improve the lives of 1000s of children.

To help with existing projects

- Sponsor a child - transform the life of an Indian child for just £11.00 or US\$20 per month
- Make a donation
- Remember us in your will
- Become a volunteer in India
- Take part in Cycle India. (Please see our website www.healcharity.org or contact a HEAL office for details of this simple method of contributing)
